Battle bay best weapons for shooter

Hi there, it was hard to decide what would be a good load weapon for my mk5 shooter at 2000 shame. I'm at the point where it will take time for each update, so I'm here for some guidance or reflection based on your experience. I'll move my weapon below: All training on Bhurt is focused on Blast Gun. I have a 5 Grenade launch epic, only to put lvl 30 epics on the table for a reasonable investment. I am currently exchanging all but a grenade launcher and an explosive cannon. I'm used to playing with explosive guns so leading the shot of my daily life if I want to do the damage. The damage table does not take into account the following set of training levels. What will be your load based on this table and your experience? On what weapons would you focus your time and sugar? Thank you in advance. Page 2 of 12 comments Battle Bay is a multiplayer mobile game that challenges players to buy, upgrade and fight each other with ships on the water. Players have begun to realize that one of the most important decisions you will make when building your ship is choosing the best weapon for this ship. Training crew members there are a few things to consider before deciding on the perfect weapon for your ship. First, you should note that each offensive item requires you to hire and train the crew member responsible for this weapon. Knowing this correlation will also provide you with an idea of whether your choice of weapon sound. For example, Bhurt is one of the first crew members you will unlock and all his talents revolve around damage boosts, increased range, cooling decreases, and more, for guns. It also provides buffs for Ship Shooter. This is a huge indication that the guns in Battle Bay are one of the best weapons for players who command shooters. Also, there's an easy way to tell which weapons and which ships each crew member specializes in just click on the training and view all the characters. The best thing about Battle Bay is that you don't need to have a character unlocked to see your talents. You can get a general idea of what each crew member is responsible for by looking at the background color in their portraits and exploring their talents. The background colors coincide with the color slots of the ship, which we talk about more in our article How to build a better ship. Choosing the Best Weapons there are a total of 19 offensive weapons in Battle Bay and, as we mentioned earlier, they all have a designated crew member. It looks like the Battle Bay developers have developed each weapon to work well with a specific ship. Guns and mortars work well with shooters, torpedoes are excellent for Speeders, so on and so forth. Gun Crewmember: Bhurt Best Weapon for: Shooter Cannon Blast Gun Sniper Guns Explosive Gun Explosive Gun Crew member: Swift Best Weapon for: Speeder Mortars Crewmember: Mortimer Best Weapon for: Shooter Standard Long Range Mortar Mortarpark Big Berta Torpedoes Crewmember: Crewmember: Best Weapon for: Speeder Big Torpedo Swift Torpedo Triple Torpedo Torpedo Rocket PickEram: Isak Best Weapon for: Enforcer High DPS Crewmember: Blastian Best Weapon for: Defender Mine Rocket Launcher Triple Torpedo Fire Bomb Crewmember: Brock Best Weapon for: Defender Rail Gun Crewmember: Dr. Buzzkill Best Weapon for: Fixer Fire DoT Crewmber That doesn't mean you don't have to try new things. As a player, you don't have to follow the structure. You can find a combo that works great for you by simply choosing your favorite weapon! After all, Battle Bay is focused on the team. How your friends play combat is another important factor in all of this. Overall, we hope this has clarified how the choice of the best weapon in Battle Bay works. This ship has more red slots than any other ship, making it able to inflict very much damage. Prior to the 4.0 upgrade, this ship received its talents from Bhurt and Mortimer. This allows them to maintain a steady stream of damage even with weapons that have long cooled. Weapons with short cools such as Cannon usually don't work well with MK4 or above arrows, although Cannon has a high DPS. This is because the cooling is so short that you don't use a large number of craft weapons slots. For example, if the MK4 Shooter is equipped with four guns, each gun will cool down faster than you could cycle through them. You better equip just one gun and then three other weapons with long cooling so you can use the gun while your heavy arms are reloading. Diversity is the key to building a strong shooter download. Since Shooters are the main dealers of the damage team, it is important that they are able to inflict this damage regardless of the situation. For example, if the main participation takes place under a low obstacle, the shooter with three different mortars will be virtually disconnected. Typically, the shooter will want at least one cannon-type weapon (or other weapon that fires a projectile straight forward), at least one mortar-type weapon (anything from a mortar or fire weapon) and at least one Torpedo-type weapon. This allows Shooter to be useful in any interaction scenario. For blue items, the best options are usually shields, turbos, or bandages. Turbo is almost necessary in order to dodge torpedo and mortar fire, as the arrows are very slow without them. Bandages are useful when your team does not have retainers, and shields work well to increase strength. Gear Lube and Rudder are usually not necessary because most combat operations for shooters occur over long distances, where the slow tower or rotation of the ship is not too harmful. Shooter is basically an offensive ship, so players should take advantage of that. Photo Gallery (edit the editing source) Note: MK1, MK2, MK3, MK6 and MK7 images are needed (until update 4.0).
